

WE'RE FLYING. TOGETHER.

ASTUTE ELECTRONICS SIGN BAE ISPA AGREEMENT - AUGUST 2010

Astute & Linear Technology: A Quality Partnership Supporting BAE's Analog Requirements.

Astute have taken on the responsibility for developing sales for Linear Technology's high performance analog products, through our existing, defence-biased customer base as well as uncovering new opportunities within the military and aerospace environment.

BAE SYSTEMS

Linear Technology Corporation (Milpitas, California) provides customers with high performance analog products, many of which support Military grade including amplifiers, comparators, voltage references, monolithic filters, linear regulators, DC/DC converters, battery chargers, data converters, communications interface circuits, RF signal conditioning circuits, iModule® products, and many other analog functions.

Astute are delighted to be partnering with such a prestigious component manufacturer. The partnership brings the perfect combination of Astute's strong commercial relationships together with Linear Technology's application and design support of their extensive range of analog semiconductors, which are well suited to demanding defence-related end equipment.

FULL SUPPORT AVAILABLE NOW ON LINEAR TECHNOLOGY

- If you require:
- The latest product information
 - Technical support from Linear Technology Direct Engineers
 - Samples of Evaluation Boards or Components
 - Quotation

Please don't hesitate to contact Matt Eustace at Astute Electronics:
E: matt.eustace@astute.co.uk • T: 01920 483849 • M: 07918 627919

Or visit us at the BAE Hot Desk any Tuesday from 10am-4pm
